MEMORANDUM OF OBJECTS AND REASONS

The principal object of this Bill is to provide a legal framework for mothers to breastfeed their children at the work place.

The Bill provides for the right of a mother to breastfeed freely or express milk for her infant. The Bill further requires employers to provide breastfeeding employees with lactation rooms to either breastfeed or express their milk for their children.

Breastfeeding is the first preventive health measure that can be given to a child at birth and it also enhances mother-infant relationship. Presently, female employees exit the work force or stop breastfeeding in order to secure their job security. This Act is intended to ensure that no woman should be forced to compromise the health of her child in order to make a living.

PART I of the Bill provides for preliminary matters including the title of the Bill and the interpretation of terms used in the proposed Act.

PART II (Clauses 3-10) of the Bill provides for the fundamental principles and rights at work for a breastfeeding mother. It provides for the right to freely breast feed or express one's milk for the infant. It also places an obligation on the employers to provide breastfeeding working mothers with rooms to either breastfeed or express their milk. It also provides for the standards of such rooms. The Bill further provides for infant changing tables. This is important because the greater majority (public) finds it unsanitary to change an infant in a public setting such as a restaurant. This provision will also cater for persons who are travelling long distances in the accompaniment of babies, ensuring that in each public restroom an infant changing facility is provided.

This part also provides for the power of the County Executive Committee to make regulations for the better carrying out of the proposed Act.

This Bill is a Bill affecting Mandera County and is an ordinary Bill.

The enactment of this Bill may occasion additional expenditure of public funds to be provided through the estimates.
