3. Prescription of Cleaning Methods.....	17

CATTLE CLEANSING AREAS

ARRANGEMENT OF SECTIONS

CATTLE CLEANSING AREAS

[Legal Notice 192 of 1967, Legal Notice 265 of 1968, Legal Notice 184 of 1970, Legal Notice 41 of 1975, Legal Notice 254 of 1977, Legal Notice 165 of 1978, Legal Notice 191 of 1978, Legal Notice 3 of 1979]

Donyo Sabuk Cattle Cleansing Area.

The area of land, the boundaries whereof commencing at the south-eastern corner of L.R. 1850/2.

Thence generally south-westerly by the north-western boundary of the Masaku Trust Land to the south-eastern corner of L.R. 2709; thence westerly, northerly and westerly by the northern boundary RLA. 8825 to its intersection with the Athi River.

Thence generally north-easterly, easterly and south-easterly by that river downstream to the point of commencement.

Laikipia District (excluding Mukogodo Special Reserve).

[L.N. 265/1968.]

Nyandarua District.

[L.N. 184/1970.]

Kirinyaga District.

[L.N. 41/1975.]

Nyeri Administrative District Murang'a Administrative District Meru Administrative District Kisii Administrative District Bungoma Administrative District Kakamega Administrative District Embu Administrative District The whole of any farm lying partly within and partly without the said Districts.

[L.N. 254/1977.]

Kiambu Administrative District.

Nyandarua Administrative District.

Kericho Administrative District.

Machakos Administrative District.

The whole of any farm lying partly within and partly without the said Districts.

[L.N. 165/1978.]

Taita/Taveta Administrative District.

The whole of any farm lying partly within and partly without the said District.

[L.N. 194/1978.]

Cattle Cleansing

[Subsidiary]

Nandi Administrative District The whole of any farm lying partly within and partly without the said District.

[L.N. 3/1979.]

PRESCRIPTION OF EFFECTIVE TICK DESTROYING AGENTS NOTICE

[Legal Notice 5 of 1979, Legal Notice 37 of 1987, Legal Notice 175 of 1992, Legal Notice 18 of 1994, Legal Notice 173 of 1994, Legal Notice 234 of 1994, Legal Notice 333 of 1994, Legal Notice 494 of 1994, Legal Notice 135 of 1995, Legal Notice 185 of 1995, Legal Notice 290 of 1995, Legal Notice 379 of 1995, Legal Notice 256 of 1995, Legal Notice 13 of 1996, Legal Notice 14 of 1996, Legal Notice 200 of 1996, Legal Notice 95 of 1997, Legal Notice 64 of 1998, Legal Notice 30 of 2000, Legal Notice 129 of 2001, Legal Notice 64 of 2002, Legal Notice 4 of 2003, Legal Notice 212 of 2003, Legal Notice 22 of 2006, Legal Notice 153 of 2007, Legal Notice 399 of 2007, Legal Notice 96 of 2008, Legal Notice 18 of 2009, Legal Notice 60 of 2009, Legal Notice 145 of 2009, Legal Notice 187 of 2010, Legal Notice 46 of 2013, Legal Notice 98 of 2013, Legal Notice 62 of 2015, Legal Notice 193 of 2015, Legal Notice 116 of 2016, Legal Notice 102 of 2017, Legal Notice 223 of 2017, Legal Notice 58 of 2018, Legal Notice 66 of 2018, Legal Notice 74 of 2018, Legal Notice 182 of 2018, Legal Notice 98 of 2019, Legal Notice 146 of 2019, Legal Notice 116 of 2020]

1. The preparations specified in the Schedule 1 hereto, in the percentages or proportions respectively specified therein, are effective tick destroying agents for the purposes of the Act.
2. Cleansing cattle by hand dressing and dipping shall be done in such a manner as is specified in Schedule 2 hereto.
3. Legal Notice No. 25 of 1976 is hereby cancelled.

Schedule 1

[Para. 1]

[L.N. 37/1987, L.N. 173/1994.]

1. A solution of arsenious oxide, As₂O₃ in the following concentrations—
 - (a) where cleaning by immersion or spraying is repeated at intervals of not more than seven or not less than five days, 0.16 per cent by weight; or
 - (b) where cleaning by immersion or spraying is at intervals of three days, 0.08 per cent by weight:

Provided that when Cooper's Improved Dip Wash S.D.C. Arsenicola Improved Dip Wash or any other dip wash specifically approved by the Director of Veterinary Services from time to time, is used, such concentration of arsenious oxide may be reduced, where the cleaning is repeated at intervals of not more than seven or less than five days, to 0.125 per cent by weight.
2. A mixture containing benzene hexachloride of which the gamma isomer concentration is not less than—
 - (a) in the case of benzene hexachloride powders and pastes, 0.02 per cent by weight (200 parts per million of water) provided that when these are used in immersion dips dipping will not be deemed to have commenced until suspension of the active principle by a suitable means of agitation is complete; or
 - (b) in the case of benzene hexachloride emulsions, 0.01 per cent by weight (100 parts per million of water).
3. An emulsion containing chlorinated camphene at concentrations of not less than—
 - (a) 0.25 per cent toxaphene when the cleaning by immersion or spraying is repeated at intervals of not more than seven days;
 - (b) 0.5 per cent toxaphene when the cleaning by immersion or spraying is repeated at intervals of not more than ten days.
4. An emulsion containing dieldrin at a concentration of not less than 0.05 per cent dieldrin when the cleaning by immersion or spraying is repeated at intervals of not more than seven days.

Cattle Cleansing

[Subsidiary]

5. A suspension of "Sevin 85 per cent Sprayable" brand of 1-naphthyl carbamate containing not less than 0.2 per cent of the active principle, when such a suspension is used for cleansing by spraying only at intervals of not more than seven days.
6. A suspension of "Supona" brand of 20 per cent water miscible concentrate Chlorfenvinphos (2 chloro-1-(2,4 dichlorophenyl)- vinyl diethyl phosphate) containing not less than 0.05 per cent of the active principle when such a suspension is used for cleansing by immersion or spraying at intervals of not more than seven days.
7. A suspension containing not less than 0.025 per cent of Chlorfenvinphos and not less than 0.025 per cent of Dioxathion (1, 4-dioxan 2, 3 diyl bis-(0 0 diethyl phosphorodithioate) when such a suspension is used for cleansing by immersion or spraying at intervals of not more than seven days.
8. A suspension of "Asuntol" brand 0, 0,—Diethyl 0,—3— chloro—4—methyl-coumarin—7—yl—phosphorothioate, containing not less than 0.05 per cent of the active principle, when such suspension is used for cleansing by immersion or spraying at intervals of not more than seven days.
9. A suspension of "Sevin 85 per cent Sprayable" brand of 1-naphthyl N-methyl carbamate, containing not less than 0.2 per cent of the active principle and to which has been added single superphosphate in a ratio of three parts of single superphosphate to one part of "Sevin 85 per cent Sprayable" by weight, when such suspension is used for cleansing by immersion only at intervals of not more than seven days.
10. A suspension of "Bacdip 50 per cent" brand of 0-Ethyl-0 (8-Quinolyl)-benzene-thionophosphonate containing not less than 0.02 per cent of the active principle, when such suspension is used for cleansing at intervals of not more than seven days.
11. A dispersion in water of "Delnav DFF"—a solvent-free water dispersable preparation of dioxithion (B. Vet. C.)—containing not less than 0.050 per cent of the active principle when such a dispersion is used for cleansing by immersion or spraying at intervals of not more than seven days.
12. An emulsion of Batestan 70 per cent brand of 0, 0, —Diethyl-S-(5, 7, dichlorobenzoxazol-2ylmethyl)-dithiophosphate containing not less than 0.049 per cent of the active principle, both in sprayrace and dip tank, when such emulsion is used for cleansing at intervals of not more than seven days.
13. A suspension in water of "Triatix 12.5 per cent" brand of a diazidine, 1, 5-di (2, 4-dimethylphenyl)-3-methyl-1, 3, 5-triazapenta-1, 4-diene containing not less than 0.025 per cent active principle, when such a suspension is used for cleansing of cattle by spraying only at intervals of not more than seven days.
14. A suspension in water of "Triatix 12.5 per cent" brand of a diazidine, 1, 5-di (2, 4-dimethylphenyl)-3-methyl-1, 3, 5-triazapenta-1, 4-diene containing not less than 0.025 per cent active principle, and stabilized with a suspension of not less than 0.3 per cent calcium hydroxide in the wash giving a pH of 11-12, when such suspension is used for cattle cleansing by submersion at intervals of not more than seven days.
15. A suspension in water of "Farmtraz 12.5 per cent" brand of diamidide, N-Methylbis (2, 4-Xylylmonomethyl) amine containing not less than 0.025 per cent active principle, when such a suspension is used for cleansing of cattle by spraying only at intervals of not more than seven days.
16. A suspension in water of "Norotraz 12.5 per cent" brand of a diamidide, N-Methylbis (2,4-Xylylimonomethyl) amine containing not less than 0.025 per cent active principle, when such a suspension is used for cleansing of cattle by spraying only at intervals of not more than seven days.
17. A suspension in water of "Agrotraz 12.5 per cent" brand of a diamidide, 2-methyl-1, 3-di (2, 4xylylimino)-2-azaperon containing not less than 0.025 per cent active principle, when

Cattle Cleansing

[Subsidiary]

such a suspension is used for cleansing of cattle by spraying only at interval of not more than seven days.

Schedule 2

[Para 2]

MANNER OF HAND DRESSING AND CLIPPING PRESCRIBED UNDER SECTION 2

(1) By applying to the insides of the ears, the end of the tail and under the tail an oily dressing; or

(2) by spraying or brushing onto the heels, the insides of the ears, the end of the tail and under the tail a suspension in water of "Delnav DFF" brand of Dioxathion containing not less than 0.1375 per centum of the active principle, or a suspension in water of "Bacdip" brand of Quintiofos containing not less than 0.02 per centum of the active principle, or a suspension in water of "Sevin 85 per cent sprayable" brand of Carbaryl containing not less than 0.2 per centum of the active principle; or

(3) if so ordered by an inspector, by removing the tail brush by clipping.

A suspension in water of "TICKATRAZ 12.5 per cent" brand of a diamidine, 1, 5-di (2, 4-dimethylphenyl)-3-methyl-1, 3, 5-triazapenta-1, 4-diene (Amitraz) containing not less than 0.025 per cent active principle, when such a suspension is used for cleansing of cattle by spraying only at intervals of not more than seven days.

[L.N. 175/1992.]

A suspension in water of "Almatix 12.5 per cent" brand of a diamidine, 1, 5-di (2, 4-dimethylphenyl)-3-methyl-1, 3, 5-triazapenta-1, 4-diene containing not less than 0.025 per cent active principle, when such a suspension is used for clean-sing of cattle by spraying only at intervals of not more than seven days.

[L.N. 18/1994.]

[L.N. 234/1994, L.N. 200/1996.]

Revoked by L.N. 200/1996.

A suspension in water of "TAKTIC 12.5 per cent" brand of diamidide, 1, 5-di (2, 4-dimethylphenyl)-3-methyl-1, 3, 5-triazapenta-1, 4-diene containing not less than 0.025 per cent active principle, when such a suspension is used for cleansing of cattle by spraying only at intervals if not more than seven days.

[L.N. 333/1994.]

A suspension in water of "Bimatraz 12.5 per cent brand of diamidine 1, 5-di (2, 4-dimethylphenyl)-3-methyl-1, 3, 5-triazapenta-1, 4-diene containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.5 per cent calcium hydroxide in the wash giving a pH of 11-12, when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 494/1994, L.N. 2/2014.]

A suspension in water of "MOSTRAZ 12.5 per cent" brand of diamidide, N-Methylbis (2,4-xylilymonomethyl) amine con-taining not less than 0.025 per cent active principle, when

Cattle Cleansing

[Subsidiary]

such a suspension is used for cleansing of cattle by spraying only at intervals of not more than seven days.

[L.N. 135/1995.]

A suspension of "TRIATIX TR", (TR-Total Replacement), a 25 per cent wettable powder brand of a Diamidine, 1,5-di-(2,4- dimethylphenyl)-3-methyl-1, 3,5-triazapenta-1, 4 diene (Amitraz) containing not less than 0.005 per centum active principle, and such a suspension should be prepared afresh before each or any dipping and should be used immediately for cleansing of cattle by submersion at intervals of not more than seven days.

[L.N. 185/1995.]

A suspension in water of "ALMATIX 12.5 per cent" brand of diamidine 1, 5-di (2, 4-dimethylphenyl)-3-methyl-1, 3, 5-triazapenta-1, 4-diene containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.5 per cent calcium hydroxide in the wash giving a pH of 11-12, when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 256/1995.]

A suspension in water of "TIXFIX 12.5 per cent" brand of diamidide, N-Methylbis (2, 4-xylylimonomethyl) amine containing not less than 0.025 per cent active principle, when such a suspension is used for cleansing of cattle by spraying only at intervals of not more than seven days.

[L.N. 290/1995.]

A suspension in water of "FARMTRAZ 12.5 per cent" brand of diamidine N—Methylbis (2, 4—Xylyliminomethyl) amine containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.5 per cent calcium hydroxide in the wash giving a pH of 11-12, when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 379/1995.]

[L.N. 13/1996, L.N. 200/1996.]

Revoked by L.N. 200/1996.

A suspension in water of "TAKTIC 12.5 per cent" brand of diamidide, 1, 5-di (2, 4-dimethylphenyl) -3-Methyl -1, 3, 5- tria-zapenta - 1, 4-diene containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.5 per cent calcium hydroxide in the wash giving a pH of 11-12, when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 14/1996.]

A Suspension in water of "BOVITRAZ 12.5 per cent" brand of diamidide, N—Methylbis (2,4-xylylimonomethyl) amine containing not less than 0.025 per cent active principle, when such a suspension is used for cleansing of cattle by spraying only at intervals of not more than seven days.

[L.N. 95/1997.]

Cattle Cleansing

[Subsidiary]

A suspension in water of "BOVITRAZ 12.5 per cent" brand of diamidide, N-Methylbis (2,4-xylyliminomethyl) amine containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.05 per cent calcium hydroxide in the wash giving a PH of 11-12, when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 64/1998.]

A suspension in water of "TIXFIX 12.5 per cent" brand of diamidide, N-Methylbis (2,4-xylyliminomethyl) amine containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.5 per cent calcium hydroxide in the wash giving a PH of 11-12, when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 30/2000.]

A suspension in water of "AMITIK 12.5 per cent" brand of diamidide, N-Methylbis (2,4-Xylyliminomethyl) amine containing not less than 0.025 per cent active principle, when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

[L.N. 129/2001.]

A suspension in water of "MOSTRAZ 12.5 per cent" brand of diamidide, N-Methylbis (2,4—xylyliminomethyl) amine containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.5 per cent calcium hydroxide in the wash giving a pH of 11-12, when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 64/2002.]

A suspension. in water of "AMTTIK 12.5 per cent" brand of diamidide, N-Methylbis (2,4xylyliminomethyl) amine containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.5 per cent calcium hydroxide in the wash giving a pH of 11-12, when such' a suspension is used for cattle cleansing by submersion at intervals of not more tthan seven days.

[L.N. 4/2003.]

1. A suspension in water of "DOMINEX 10 percent" brand of alphacypermethrin, alpha-cyano-3-phenoxybenzyl-3-(2,2-dichlorovinyl)2-2-dimethyl-cyclopropane caboxylate containing not less than 0.005 percent active principle when such a suspension is used for cattle cleansing by spraying or submersion at intervals of not more than seven days.

2. A suspension in water of "DICATIX 5 percent" brand of deltamethrin, (S)-cyano-3- phenoxybenzyl, (IR, 3R)-3-(2,2-dibromovinyl)-2-2-dimethyl-cyclopropane carboxylate containing not 2-dichlorovinyl) 2, 2-dimethyl-cyclopropane carboxylate containing not less than 0.005 percent active principle when such a suspension is used for cattle cleansing by spraying or submersion at intervals of not more than seven days.

3. A suspension in water of "DELETEEC 5 percent" brand of deltamethrin, (S)-alpha-cynano-3-phenoxybenzyl, (IR)-cis-3-(2,2-dibromovinyl)-2, 2-dimethyl-cyclopropane carboxylate containing not less than 0.005 percent active principle when such a suspension

Cattle Cleansing

[Subsidiary]

is used for cattle cleansing by spraying or submersion at intervals of not more than seven days.

4. A suspension in water of "DELTAB 25 percent" brand of deltamethrin, (S)-alpha-cyano-3-phenoxybenzyl, (IR)-cis-3-(2,2-dibromovinyl)-2, 2-dimethyl-cyclopropane carboxylate containing not less than 0.005 percent active principle when such a suspension is used for cattle cleansing by spraying or submersion at intervals of not more than seven days.

5. A suspension in water of "ECTOMIN 10 percent" brand of cypermethrin, (RS)-alpha-cyano-3-phenoxybenzyl (IR)-cis, trans-3-(2,2-dibromovinyl)-2, 2-dimethyl-cyclopropane carboxylate containing not less than 0.01 percent active principle when such a suspension is used for cattle cleansing by spraying or submersion at intervals of not more than seven days.

6. A suspension in water of "GRENADE 5 percent" brand of cyhalothrin, (RS)-alpha-cyano-3-phenoxybenzyl (IR)-cis, (Z-2-chloro-3-3,3, trifluoropropyl-enyl), 2, 2-dichlorovinyl) 2, 2-carboxylate containing not less than 0.005 percent active principle when such a suspension is used for cattle cleansing by spraying or submersion at intervals of not more than seven days.

7. A suspension in water of "PYTIX 4 percent" brand of natural pyrethrins,-2, 2-dimethyl-3-(2-methyl-propenyl)-2-methyl-4-oxo-3-2, 4-pentadienyl)-2-cyclopenten and 3-(3-methoxy-2-methyl-oxo-1-propenyl)-2, 2-dimethyl-2-methyl-4-oxo-3-(2, 4-pentadienyl)-2-cyclopenten, containing not less than 0.05 percent active principle when such a suspension is used for cattle cleansing by spraying or submersion at intervals of not more than seven days.

8. A suspension in water of "DOMINEX-TAB 10 percent" brand of alphacypermethrin, alpha-cyano-3-phenoxybenzyl-3-(2,2- dichlorovinyl) 2-2- dimethyl-cyclopropane carboxylate containing not less than 0.005 percent active principle when such a suspension is used for cattle cleansing by spraying at intervals of not more than seven days.

9. A pour on formulation of "BAYTICOL 1 percent" brand of flumethrin, a- cyano-(4-flouro-3-phenoxy)-benzyl-3-2 (2-chloro-2-) 4-chlorophenyl)-ethyl-2, 2 dimethyl- cyclopropane carboxylate containing not less than 1 percent active principle when such a spot-on is used for cleansing of cattle at a rate of 10 ml. per 100kg. body weight by applying directly onto cattle at intervals of not more than seven days.

10. A spot-on formulation "ECTOPOR 2 percent" brand of cypermethrin (RS)-alpha-cyano-3-phenoxybenzyl (IR)-cis trans-3-(2, -2-dichlorovinyl) 2, 2-dimethyl-cyclopropane carboxylate containing not less than 1 percent active principle when such a spot-on is used for cleansing of cattle at a rate of 10 ml. per 100kg. body weight by applying directly onto cattle at intervals of not more than seven days.

11. A spot-on formulation "DELETE 0.5 percent" brand of deltamethrin, (S)-alpha-cyano-3-phenoxybenzyl, (IR)-cis-3-(2, 2-dibromovinyl)-2, 2-dimethyl-cyclopropane carboxylate containing not less than 0.5 percent active principle when such a spot-on is used for cleansing of cattle at a rate of 10 ml. per 100kg. body weight by applying directly onto cattle at intervals of not more than seven days.

[L.N. 212/2003.]

1. A suspension in water of "VECTOCID 5 per cent" brand of deltamethrin, (S)-cyano-3-phenoxybenzyl-(IR, 3R)-3-2, 2-(dibromovinyl)2; 2- dimethyl) cyclopropanecarboxylate containing not less than 0.005 percent active principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

2. A suspension in water of "CYPERGUARD10 per cent" brand of cypermethrin,(RS-alpha-cyano-3-phenoxybenzyl (IRS, 3S)- (IRS, 3S))-3-(2,-2-dichlorovinyl) 2,2 dimethyl cyclopropanecarboxylate containing not less than 0.01 per cent active principle when such a

Cattle Cleansing

[Subsidiary]

suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

3. A suspension in water of "BAYTICOL 2 per cent" brand of flumethrin 3-(2-chloro-2-(4-chlorophenyl) ethyl-2, 2-dimethyl-, cyano-(4-fluoro-3-phenoxyphenyl) methyl ester containing not less than 0.005 per cent active principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

[L.N. 22/2006.]

(a) A suspension in water of "NOROTRAZ 12.5 per cent" brand of diamidine, N-Methylbis (2, 4 – xylylimonomethyl) amine containing not less than 0.025 per cent active principle and stabilized with a suspension of not less than 0.3 per cent calcium hydroxide in the wash giving a pH of 11-12, when such suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

(b) A suspension in water of "SYPERTIX 10 per cent" brand of alphacypermethrin, alpha- cyano 3-phenoxybenzyl-3 (2,2-dichlorovinyl)2-2- dimethyl-cyclopropane caboxylate containing not less than 0.005 per cent active principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

(c) A suspension in water of "NOTIX 5 per cent" brand of deltamethrin, (S)- cyano-3-phenoxybenzyl-(IR, 3R)-3-2, 2- (dibromovinyl-2, 2-dimethyl cyclopropane carboxylate containing not less than 0.005 per cent active principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

[L.N. 153/2007.]

1. A suspension in water of "DOMINATOR 10 percent" brand of alphacypermethrin, alpha-cyano-3-phenoxybenzyl-3(2, 2-dichlorovinyl)2-2-dimethyl-cyclopropane caboxylate containing not less than 0.005 percent active principle when such suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

2. A suspension in water of "PYECLEAN 10 percent" brand of alphacypermethrin, alpha-cyano-3-phenoxybenzyl 1-3-(2, 2-dichlorovinyl) 2-2 dimethyl-cyclopropane caboxylate containing not less than 0.005 percent active principle when such a suspension is used for cattle cleansing by spraying or submersion at intervals of not more than seven days.

3. A suspension in water of "BILATIX 10 percent" brand of cypermethrin, (RS-alpha-cyano-3- phenoxybenzyl (IRS,3S) – 3 – (2, -2-dichlorovinyl) 2,2 dimethyl cyclopropanecarboxylate containing not less than 0.01 percent active principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

4. A suspension in water of "BYE BYE 12.5 per cent" brand of diamidine, N-methylbis (2,4-xylylimonomethyl) amine containing not less than 0.025 per cent active principle, when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

5. A suspension in water of "VECTOCID 5 percent" brand of deltamethrin, (S)-cyano-3-phenoxybenzyl- (IR, 3R), - 3 -2, 2- (dibromovinyl – 2, 2- dimethyl cyclopropanecarboxylate containing not less than 0.005 percent active principle when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 399/2007.]

A suspension in water of "SYPERTIX 10 per cent" brand of alphacypermethrin, alpha-cyano-3-phenoxybenzyl-3-(2,2-dichlorovinyl) 2-2 dimethyl-cyclopropane caboxylate

Cattle Cleansing

[Subsidiary]

containing not less than 0.005 per cent active principle when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 96/2008.]

1. Suspension in water of "DOMINATOR 10 per cent" brand of alphacypermethrin, alpha-cyano-3-phenoxybenzyl-3-(2,2-dichlorovinyl) 2,2-dimethyl-cyclopropane caboxylate containing not less than 0.005 per cent active principle when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

2. A suspension in water of "BILATIX 10 per cent" brand of cypermethrin, (RS-Cyano-3-phenoxybenzyl (IRS, 3S)-(IRS, 3S)- 3-(2,-2-dichlorovinyl) 2,2 dimethyl cyclopropane caboxylate containing not less than 0.01 per cent active principle when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

3. A suspension in water of "PARACIDE 7 per cent" brand of alphacypermethrin, alpha-cyano-3-phenoxybenzyl-3-(2,2-dichlorovinyl)2,2-dimethyl-cyclopropane carboxylate containing not less than 0.007 per cent active principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

[L.N. 18/2009.]

1. A suspension in water of "ALFAPOR 10 per cent" brand of alphacypermethrin, alpha-cyano-3-phenoxybenzyl-3-(2,2-dichlorovinyl)2,2- dimethyl-cyclopropane caboxylate containing not less than 0.005 per cent active principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

2. A suspension in water of "BIMATIX 10 per cent" brand of alphacypermethrin, alpha-cyno-3-phenoxybenzyl-3-(2, 2-dichlorovinyl)2,2- dimethyl-cyclopropane caboxylate containing not less than 0.005 per cent activate principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

3. A suspension in water of "TWIGATRAZ 12.5 per cent" brand of diamidine, N- Methylbis (2, 4- xylylimonomethyl) amine containing not less than 0.025 per cent active principle when such a suspension is used for cattle cleansing by spraying only at intervals of not more than seven days.

[L.N. 60/2009, L.N. 98/2013.]

A suspension in water of "CYPERGUARD 10 per cent" brand of cypermethrin, cyano-3-phenoxybenzyl-3-(2,-2-dichlorovinyl)2,2-dimethyl-cyclopropane carboxylate containing not less than 0.01 percent active principle, when such a suspension is used for cattle cleansing by submersion at intervals of not more than seven days.

[L.N. 145/2009.]

1. A suspension in water of "ACTRAZ 12.5 per cent" brand of diamidine, N-Methylbis (2, 4 - xylylimonomethyl) amine containing not less than 0.025 per cent active principle when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

2. A suspension in water of "EX-KUPE 50 per cent" brand of deltamethrine,(S)-cyano-3phenoxybenzyl-(1R, 3 R)- 3-2, 2-(dibromovinyl- 2,2-dimethyl cyclopropanecarboxylate, containing not less than 0.005 per cent active principle when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 187/2010.]

Cattle Cleansing

[Subsidiary]

A suspension in water of DUODIP® 55% EC brand of Cypermethrin: Cyano (3-phenoxyphenyl) methyl 3 (2,2-dichloroethenyl) 2,2-dimethyl=Cyclopropanecarboxylate and Chlorpyrifos: 0,0-diethyl 0-3, 5, 6-trichloro-2- pyridyl phosphorothioate containing not less than 0.055 per cent of the active principle when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 46/2013.]

A suspension in water of "DUODIP 55% EC" brand of Cypermethrin: Cyano (3-phenoxyphenyl) methyl 3 (2, 2dichloroethenyl) 2, 2- dimethyl = Cyclopropanecarboxylate and Chlorpyrifos: 0, 0-diethyl 0-3, 5, 6-trichloro-2-pyridyl phosphorothioate containing not less than 0.055 per cent active principle when such a suspension is used for cattle cleansing by submission at intervals of not more than seven days.

[L.N. 62/2015.]

A suspension in water of CARBATIX 85 S WP 'brand of 1-naphthyl methylcarbamate containing not less than 0.2 per cent, active principle when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 193/2015.]

A suspension in water of "ELIMINATOR 10% E.C. brand of alphacypermethrin, alpha-cyano - 3-phenoxybenzyl - 3(2,2)-dichlorovinyl) 2-2-dimethyl-cyclopropane carboxylate containing not less than 0.005 per cent active principle when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 116/2016.]

[L.N. 102/2017.]

Revoked by L.N. 223/2017.

A suspension in water of "Sidai Ultradip", an emulsifiable concentrate, containing 50g/l Cypermethrin and 500 g/l Chlorpyrifos when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

The Cattle Cleansing Act (Prescription of Effective Tick Destroying Agents), 2017 (L.N. 102 of 2017), is revoked.

[L.N. 223/2017.]

Twigatraz® 12.5 % EC in plunge dips at a charging rate of 1.500 and replenishment rate of 1.250 when stabilized with lime at the rate of 35 kg of lime for every litre of the acaricide used at a dipping interval of 7 days.

[L.N. 58/2018.]

A suspension in water of Dabotik 522.5 BC, an emulsifiable concentrate, containing Cypermethrin and 475g/l Chlorpyrifos, when such suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 66/2018.]

Cattle Cleansing

[Subsidiary]

A suspension in water of Daltix 100 EC, containing alphacypermethrin 100g/l when such suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 74/2018.]

A suspension in water of TIKDIP 522.5EC. an emulsifiable concentrate, containing 47.5g/l Cypermethrin and 475g/l Chlorpyrifos when used for cattle cleaning by hand spraying only at the rate of 1ml per litre of water at intervals of not more than seven (7) days.

[L.N. 182/2018.]

A suspension in water of "cyperdip 55% EC", an emulsifiable concentrate, containing 50g/l cypermethrin and 500 g/l chlorpyrifos when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 98/2019.]

A suspension in water of "Vectoclor plus EC", an emulsifiable concentrate, containing 15g/l cypermethrin 25g/l chlorpyrifos, 15g/l piperonyl butoxide and 1g/l citronella when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 146/2019.]

A suspension in water of Cychlotix® 55% Emulsifiable Concentrate (EC), containing 5% Cypermethrin and 50% Chlorpyrifos when such a suspension is used for cattle cleansing by hand spraying only at intervals of not more than seven days.

[L.N. 116/2020.]

PRESCRIPTION OF CLEANING METHODS

[Legal Notice 194 of 1979]

IN EXERCISE of the powers conferred by section 2 of the Cattle Cleansing Act, the Director of Veterinary Services prescribes that the cleaning of cattle within the cattle cleansing areas set out in the Schedule shall be by dipping or by mechanical spraying at intervals not exceeding seven days.

Schedule

- (a) Kirinyaga Administrative District
 - (b) Nyeri Administrative District
 - (c) Murang'a Administrative District
 - (d) Kiambu Administrative District
 - (e) Nyandarua Administrative District
 - (f) Embu Administrative District
 - (g) Meru Administrative District
 - (h) Machakos Administrative District
 - (i) Bungoma Administrative District
 - (j) Kakamega Administrative District
 - (k) Kisii Administrative District
 - (l) Kericho Administrative District
 - (m) Taita /Taveta Administrative District
 - (n) The Whole of any farm lying partly within and partly without the said Districts.
-
